

### School Bus Announcement System

DEVOS supports a simple system that allow you to display real-time school bus announcements. Simply display the bus page in Digital Signage<sup>1</sup> or display the page directly.

#### Setup

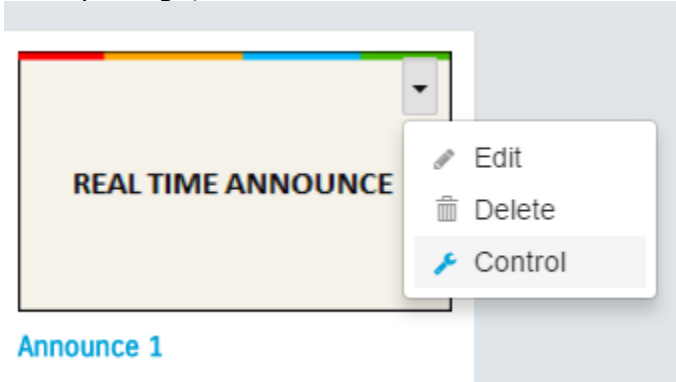

There are 10 possible unique announcements, school1 through school10<sup>2</sup>. School1 would be used by one school, school2 would be used by another, etc. The system administrator should decide which school will use each.

To set up your bus announcement, select Real Time Announce from the Digital Signage menu, then select Announce 1 through 10.

Digital Signage

Save you sign, then select "Control" from the menu

<sup>1</sup> Web page display not available on Roku or Samsung devices.

<sup>2</sup> Contact Discover Video if you need more than 10.

## Application Note

This will open a new web page where you can enter the number of "slots" you require, as well as the name of each. You control the display from this page. The default password is: pass. Contact support if you wish to change this for any of the 10 announcement boards.

### Mobile

Mobile use makes it possible to signal the system from anywhere, in particular from a school's bus loading area where a safety official can be certain a bus is indeed ready for student loading.

You don't need to install a special App to use the system on any SmartPhone or tablet. Teachers or other officials may easily open the admin page on their cell phones and control the bus announcement system (just send an email with the link to make it easy, and then bookmark the page on the cell phone's browser).

If you also make announcements over a Public Address system, the office staff can simply monitor the viewing page to know when to call which bus.

**Announcement System 9:34:17**

Name		
bus 101	STOP	GO
bus 102	STOP	GO
bus 103	STOP	GO
bus 104	STOP	GO
bus 105	STOP	GO
bus 106	STOP	GO
bus 107	STOP	GO
bus 108	STOP	GO
bus 109	STOP	GO
bus 110	STOP	GO

To set the number of slots, enter number and select 'Generate'

Number of Slots:

Password:

### Digital Signage

To integrate the announcement system in Digital Signage, simply use the DEVOS Web Template and paste in the view URL.

With the bus announcement in a Web Template, you may now create a daily schedule, for example, show slides at 6:00AM, morning announcements at 8:00AM, slides at 8:15AM, Bus Announcements at 2:30PM, and slides at 3:00PM.

### Other Uses

Because you can change the text in each slot, you can use the system for many other applications.

**Time: 9:29:44**

bus 101		bus 102	
bus 103		bus 104	
bus 105		bus 106	
bus 107		bus 108	
bus 109		bus 110	

For example, you can use it in place of a "take a number" customer queue. Enter people's names in slots and select GO when you want them to proceed.
