

Overview

The Discover Video Digital Enterprise Video Online Streaming system (DEVOS) is a live and on-demand video portal for small enterprises such as schools, colleges, and corporate departments. DEVOS Stinger can support up to 500 simultaneous live video viewers using conventional streaming or a virtually unlimited number of viewers via IP multicast.

Automatic Streaming & Capture

DEVOS automatically configures encoders for live streaming and/or video capture, and captured video is automatically uploaded to the system. Whether you have one encoder for live announcements or an encoder in every room, DEVOS can configure and schedule your streaming.

Mobile And Desktop Viewing

You may use your iPad, Windows PC or Apple MAC to view any live or on-demand video. View stunning high definition live video, and enjoy instant easy navigation of video on demand.

Compact Versatile Design

The DEVOS Stinger Server is a self-contained, low cost, fully automatic, streaming server and media management system for businesses, schools, government, and healthcare organizations. It is ideal for small to medium sized enterprises or departments in larger organizations that need video streaming, digital signage, or a Priority Alert notification system.

- Full Live and On-Demand Streaming Server
- Great for Digital Signage Systems
- High Definition, 4K and 360 Video
- Delivers Live to Computers, TVs and Mobile
- Supports Priority Alert

Deliver Any Content
