

Overview

The Set Top Box (STB) works with the Discover Video DEVOS system to provide easy user selection of desired content, and also operates as a server-controlled decoder.

Simple

Just plug the STB into the Ethernet network, set the DEVOS/DV Express portal address, and you are done. Channel surf using the IR remote control.

Remote Control

The STB can be remotely controlled by the DEVOS system. Select any video view it, and select "Send to TV" to cause the content to be automatically displayed on the STB.

HD/SD

Connect your audio/video to your TV or projector via HDMI to display full HD video, or use composite video (cable not included) to show your content on an older SD TV.

Multi-protocol

View your live streams via unicast or IP multicast directly from the DEVOS system or other source. The STB supports http, rtmp, HLS, IGMP, and Discover Video Low Delay video streams.

Display

- Live Video
- IPTV Channels
- Video on Demand

Quality

- Up to High Definition Video

Automatic

- Plug and Play simplicity
- Connects to DEVOS system

Benefits

- Built-in WiFi & Ethernet

Specifications

- **Model** - Set Top Box
- **Dimension** - 127 mm x 87 mm x 30mm (5" x 3.4" x 1.2")
- **CPU** - STi7105
- **RAM** - 256Mb
- **Flash** - 265 Mb
- **OS** - Linux 2.6.x
- **USB** - USB 2.0
- **HDMI** - HDMI V1.4a
- **Composite**
- **Audio** - HDMI Embedded audio, Analog Audio
